SUMMARY:

Results-driven Java Full Stack Developer with internship experience designing and deploying scalable web applications using Java, Spring Boot, React.js, and MySQL. Proficient in RESTful API development, ORM-based database integration, and Agile delivery. Demonstrated ability to reduce errors, improve performance, and build responsive UIs. Actively seeking an entry-level Software Engineer role to deliver impactful engineering solutions.

Internship Experience:

Java Developer Intern

Rejola IT Services Pvt Ltd, Chennai - Remote

May 2025 – July 2025

- Designed and developed a Task Management System with JWT-based authentication and real-time task tracking, improving team task visibility by 40% across 3 user roles.
- Integrated MySQL with Hibernate ORM to abstract raw SQL, implementing entity mappings and cascading operations that cut manual query errors by 25%.
- Participated in structured code reviews and pair programming sessions, applying SOLID principles to reduce post-deployment bugs by 15%.

Java Full Stack Developer Intern

Besant Technologies, Chennai.

Sep 2025 – Feb 2026

- Engineered 10+ RESTful APIs using Spring Boot and MySQL to handle entity CRUD operations, reducing data exchange latency by 30% and enabling seamless frontend-backend integration.
- Built reusable React.js UI components with hooks and client-side routing, improving page load responsiveness and boosting user engagement metrics by 20%.
- Contributed to 3 Agile sprints by breaking down user stories into tasks, participating in daily standups, and delivering features 10% ahead of schedule through iterative feedback loops.

PROJECTS

Book Store |SpringBoot|Java|MYSQL

[\(Github-Link\)](#)

- Built an end-to-end book management platform with product search, cart, purchase flow, and an admin dashboard to manage 200+ book records.
- Optimized 5+ MySQL queries using indexed joins and stored procedures, cutting average query response time by 35%.
- Implemented pagination and lazy loading on the React frontend, reducing initial page load time by 40% for large product catalogs.

CRUD Application |React

[\(Github-Link\)](#)

- Developed a dynamic CRUD application with efficient data handling and a clean user interface.
- Improved user experience with validation, responsive design, and fast UI updates.

Hotel Management System |MySQL

[\(Github-Link\)](#)

- Designed a normalized relational database schema (3NF) with 8 tables covering guest profiles, room inventory, bookings, and billing.
- Implemented stored procedures for automated billing calculation and room availability checks, reducing manual processing time by 50%.

Microservices-Based Project Management System

[\(Github-Link\)](#)

- Decomposed a monolithic project tracker into 4 independently deployable microservices (User, Task, Project, Notification) using Spring Cloud, reducing service coupling and enabling independent scaling.
- Secured inter-service communication with JWT-based authentication and role-based authorization, protecting 100% of API endpoints from unauthorized access.
- Documented all REST endpoints via Swagger/OpenAPI, reducing onboarding time for new developers and enabling self-service API testing.

TECHNICAL SKILLS

Frontend: HTML5, CSS3 (Flexbox, Grid, Animations), JavaScript (ES6+), React.js (Hooks, Routing)

Backend: Java (OOP, Collections, Multithreading), Spring Boot, Spring Cloud, Hibernate ORM

Database: MySQL (Joins, Stored Procedures, Indexing, DDL/DML/DQL)

Tools: Git, VS Code, Eclipse, MySQL Workbench, Swagger/OpenAPI, Postman

Concepts: RESTful APIs, Microservices, JWT Authentication, Agile/Scrum, Debugging & Optimization

EDUCATION

B.Sc (Information Technology)-JP College Of Arts & Science -Tenkasi

2021-2024

CGPA: 7.0

HSC – GOVT-HR-SEC-School,Melagaram-Tenkasi

2019-2020

Percentage: 50%
